

ANON

Animal's Nature Organization Non-profit

ANON is a non-profit organizations/community creating by Internet users from all of the countries. Our priority is make animal's life better.

We are trying to change the way of look at the animals by convince people that they deserve for protection, care and respect, because they are similar to humans. The animals can think, learn, they have an emotions, relationships (especially a pets), which require from us treating them subjectively not objectively (like an object).

To achieve this goal we have to make a progress in education and law by:

- * teaching people about diversity in animal's kingdom, habits of a different species (way of life) and environmental requirements,
- * teaching children and adults that animals are not a toy or „a gift“ to stop progressive homelessness among abandoned animals,
- * introducing an obligation to registry pets at the vet and annual control of their conditions to stop the domestic violence and cruelty of the owners,
- * changing the law in terms of consequences for a killing and bullying animals (tighten penalties),
- * reduce signs of hostility to animals at the Internet,
- * leading an voluntary investigation about the cases of abuse at the Internet to help the law enforcement authorities,
- * finally - reduce the indicator of abuse animals by pharmaceutical, food and fur industry.

Our activities

Realization of our mission requires a **voluntary teamwork** beetwen people from many diferrent places. That is why we work at the Internet.

In the field of education:

- * we are inviting the people to ANON web site to helping spread our activity,
- * we are writing an articles about animals (life/experiences with the animals, diversity, habits, environmental requirements),
- * we are writing an articles about animals in pharmaceutical, food and fur industry,
- * we organize competitions (for example a competition for *best photo with pets*) to encourage people to have a real, close contact with animals,
- * we organize events/conferences online at the Google Meet about the animals.

In the field of law:

- * we are writing an articles about the criminal cases relative to animals,
- * we are looking for or prepare statistics about cases of violence relative to animals and publish it,
- * we pay attention to cases of aggressive behaviour relative to animals at the Internet and follow them to check it,
- * we notify the relevant services if we know about anything disturbing,
- * we cooperate with other organizations and associations to unite the community of people who are interested to protect the animals,
- * we organize petitions to change the law in terms of consequences for a killing and bullying animals (tighten penalties),
- * we are following a work of pharmaceutical, food and fur industry to check are they care about good

conditions of animal's life and there is no abuse.

How it works?
